Setup

Downloading file 1 of 1: `house.csv`

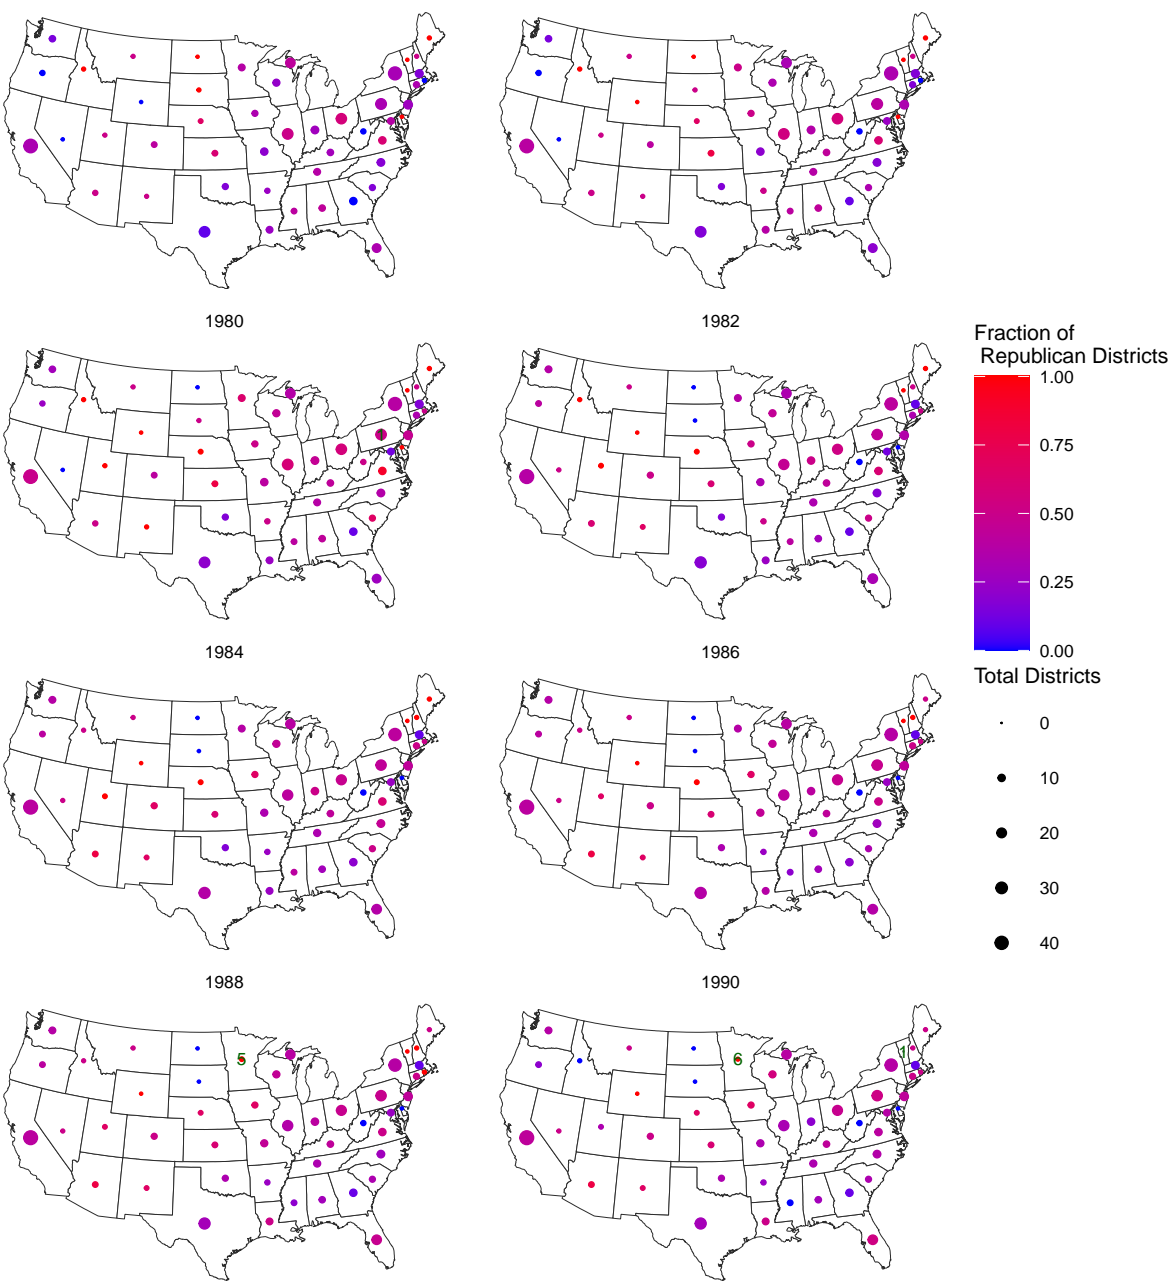

Visualization

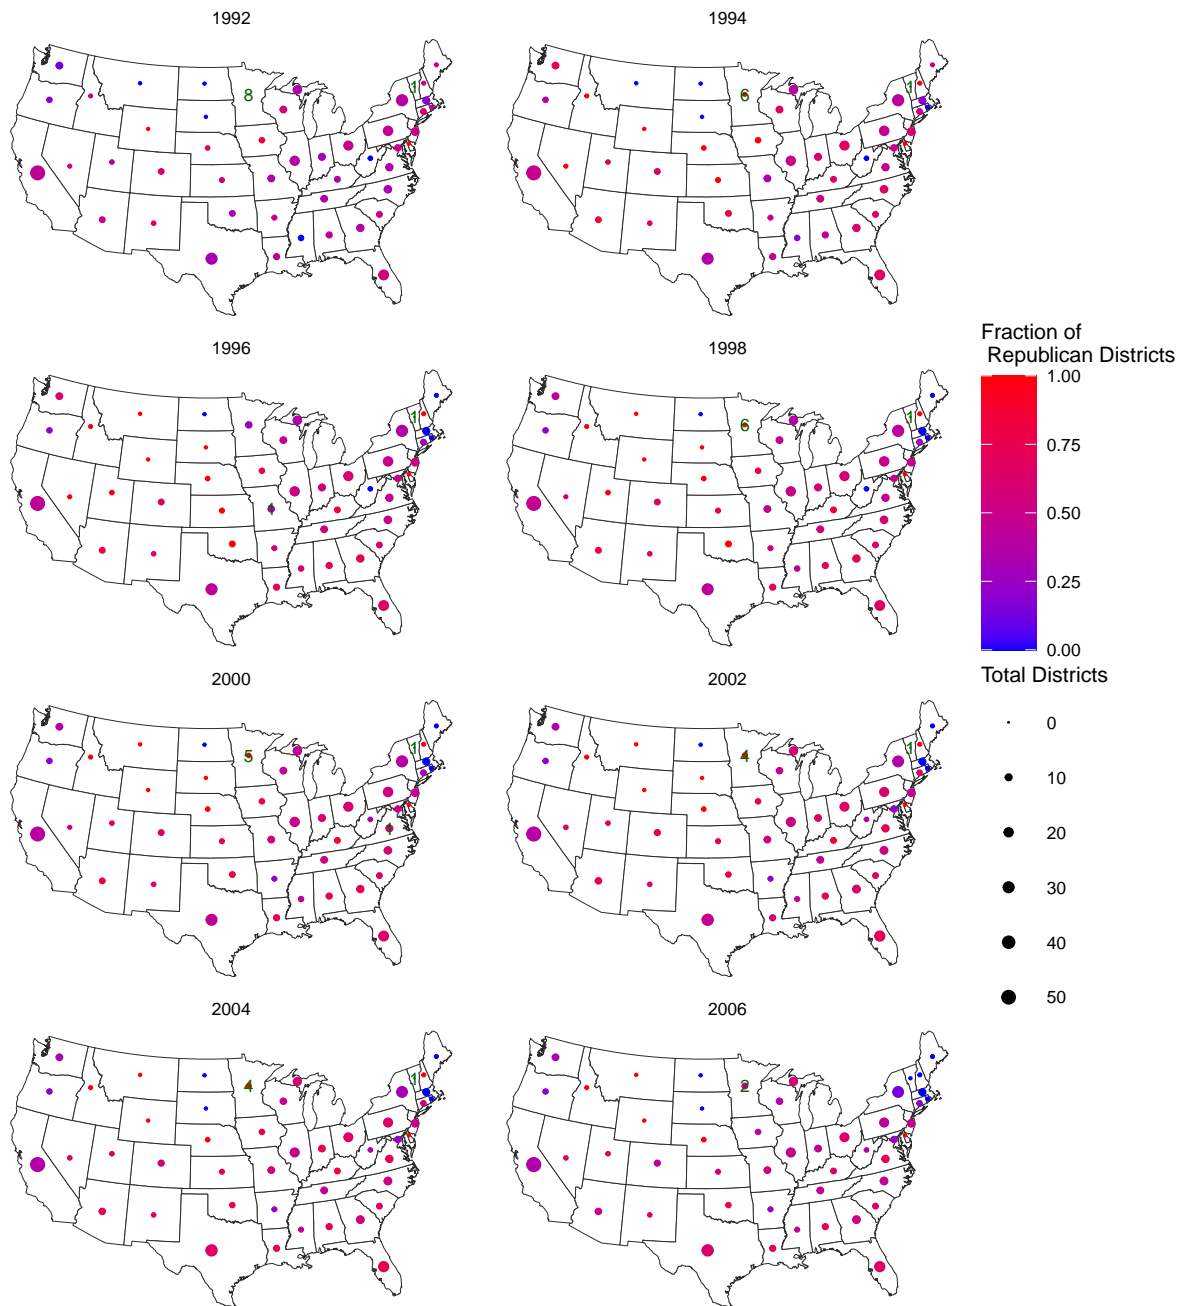

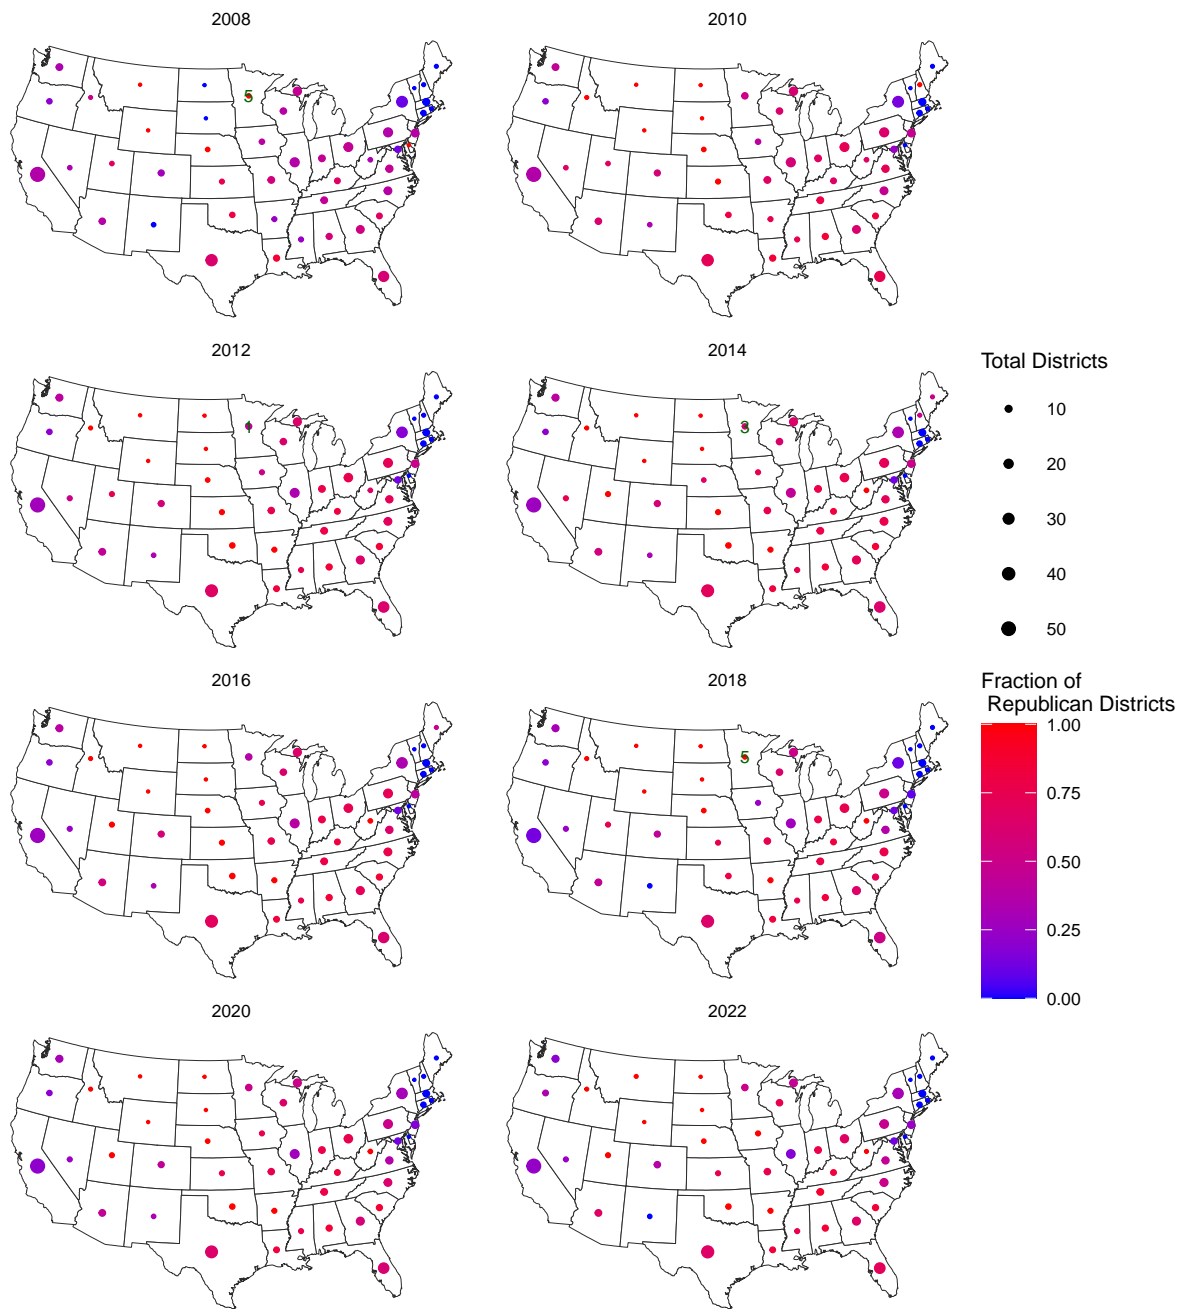

Let's see how the data is spread spatially over time for each election period (2 years) by county. For simplicity, only Democrat and Republican winners will be separated from "Other" winners.

``summarise()`` has grouped output by 'year'. You can override using the `` .groups `` argument.

Distribution of US House Districts Won by Geography

Number listed in state represents district representatives with independent affiliation.
